How to use Charger IP Tool (Windows)
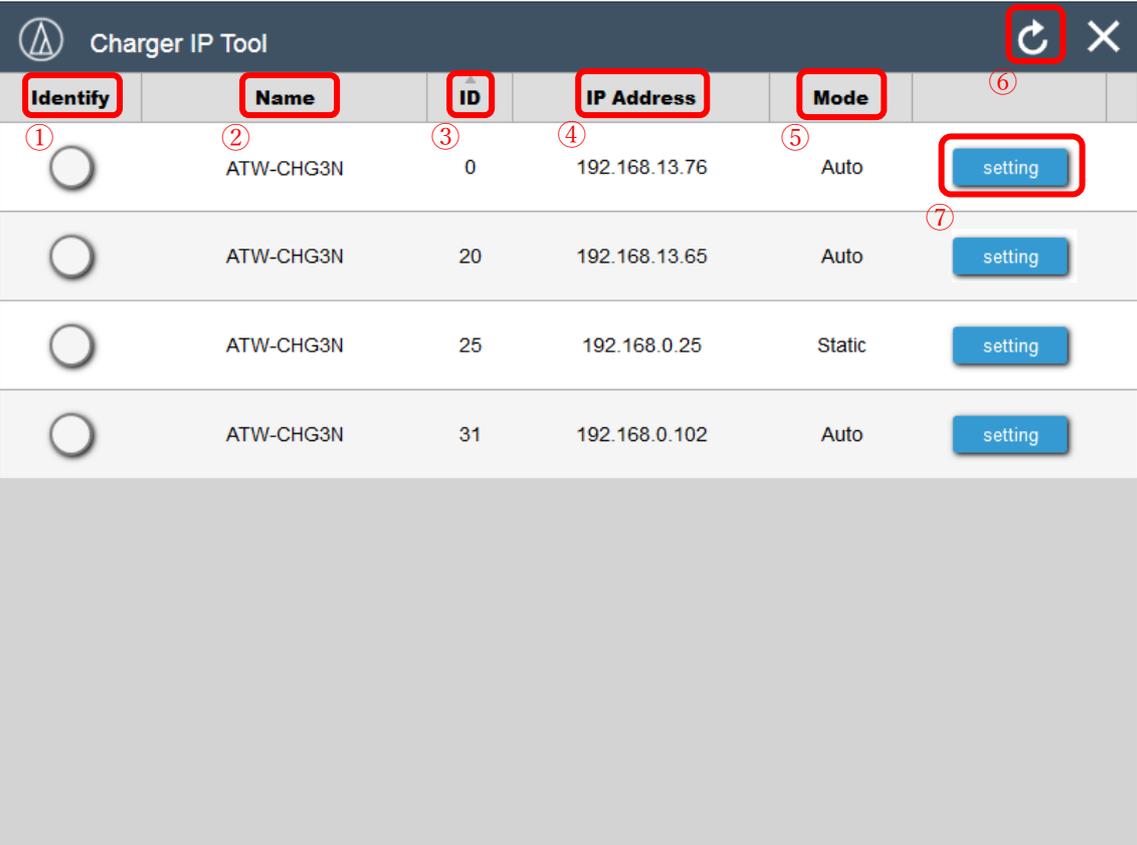

About Charger IP Tool:

- Audio-Technica Charger IP tool enables you to use a computer to view all ATW-CHG3N chargers on the network and configure their network settings.

System Requirement:

- Microsoft Windows 7 or later.

Charger IP Tool Screen:

Charger IP Tool lists the chargers detected on the network and displays their Name, ID, and IP Address, and whether the IP Address is set to Static or Auto.

①	Identify	Clicking the Identify button for a charger causes the LEDs on that charger to blink.
②	Name	Displays the name of each unit. Clicking on [Name] sorts the list in ascending or descending alphanumeric order.
③	ID	Displays the ID of each unit. Clicking on [ID] sorts the list in ascending or descending number order.
④	IP Address	Displays the IP address of each unit. Clicking on [IP Address] sorts the list in ascending or descending alphanumeric order.
⑤	Mode	Displays the IP configuration mode, Auto or Static, of linked devices.
⑥	Refresh	Clicking on the Refresh icon refreshes the list.
⑦	Setting	Clicking [Setting] opens the setting window for the selected charger.

Setting Window

①	Device ID	Set the Device ID as a number from 0 to 255.
②	Auto/Static	Select the IP configuration mode, Auto or Static, of the selected charger.
③	IP Address, Subnet Mask, Gateway Address	When IP configuration mode Static is selected, set the IP Address, Subnet Mask and Gateway Address.
④	Apply	Apply the settings to the selected charger.
⑤	Cancel	Undo and close the window.
