

IDEAL FOR CREATING SYSTEM X DESK MOUNTS

BT8390-ADP

SYSTEM X™ MOUNTING ADAPTOR PLATE

The BT8390-ADP is an adaptor plate which allows a range of B-Tech flat screen wall and desk mounts to be fitted onto System X mounting rails. This is ideal for assembling multi-screen installations using small screens or for setting up multiple work stations in a side-by-side or back-to-back format. To attach small flat screens onto a rail, the BTV112, BTV113, BTV114, BTV502, BTV503 & BTV504 can be fitted directly to the BT8390-ADP plate, which in turn fits onto any BT8390 rail. Also compatible is the BT7399 Wall Mounting Adaptor, which allows B-Tech desk mounts to be fitted to the BT8390-ADP plate and then onto System X rails.

SPECIFICATION

Steel thickness	5mm
Mounting plates supplied	1
Colour	Black

FEATURES

- Mount a range of B-Tech wall mounts and desk arms to BT8390 mounting rails to create a wide variety of different installations
- Ideal for creating multi-screen setups of any size
- Can be positioned anywhere along the rail for perfect screen positioning
- Suitable for single or back-to-back solutions (*multiple BT8390-ADP required*)
- Allows screens to be mounted in either portrait or landscape orientations
- Retains all Full Motion functionality when used with B-Tech Full Motion desk mounts for easy adjustment of mounted screens in any direction
- Quick and simple installation
