

► Features

- Flexible structure for system integration & connectivity
- Wide variation of compatible modules available
- Stores 4 units of CASY modules
- Included cable gland with strain relief
- Mounting hole for assembly of D-size connector on side
- Pre-threaded mounting profile for easy assembly
- Aluminum extruded construction with steel side panels
- Structured and scratch resistant black powder coating

► Description

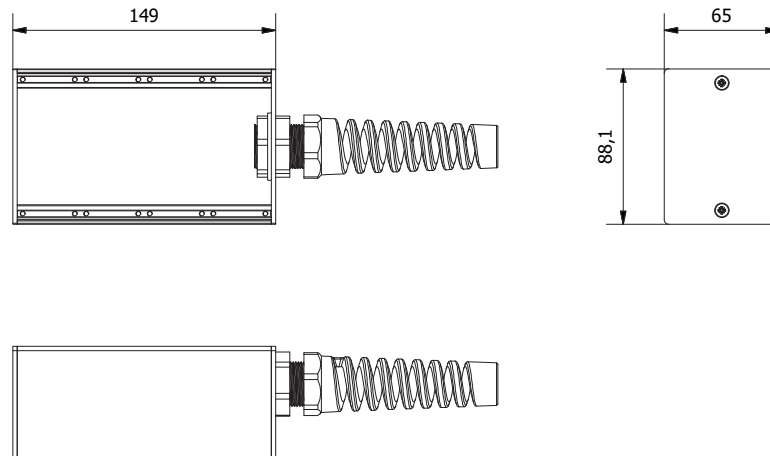

The CASY044 is a modular stage box which can be fitted with 4 modules from the CASY range. The flexible and modular structure ensures a maximum versatility, allowing to adapt the system to each project's specific requirements. Possibilities are ranging from audio, video and data interconnection to power distribution, control panels, power supplies and many more.

The aluminum construction features pre-threaded hole inserts allowing module installation with a maximum of 4 units with a built-in depth up to 60 mm. It is fitted with a cable gland with strain relief accepting diameters in a range of 9 to 16 mm, which can be removed for assembly of a D-sized connector type (e.g. PowerCON). The sides are constructed out of cold-rolled steel and modules can be fixed inside the unit using the included M3 screws. The overall construction is finished in a black (RAL9004) structured and scratch resistant powder coating.

series

► Technical Drawing

► Specifications

PROPERTY	VALUE
Module units	4 x front side
Width	149 mm (excl cable gland)
Height	88,1 mm
Depth	65 mm
Usable depth	60 mm
Weight	0.511 Kg
Construction	Alu extrusion with steel side panels
In / output connection	9 ~ 16 mm cable gland (standard) D-size connector (option)
Finishing	Structured powder coat
Colour	Black (RAL9004)

► Optional Accessories

ARTICLE	DESCRIPTION
CASYx0x	Blind / connector hole plates
CASYx2x	XLR connector plates
CASYx3x	Audio signal connector plates
CASYx4x	Loudspeaker connector plates
CASYx5x	Video connector plates
CASYx6x	Data connector plates
CASYx8x	Power connector plates
CASYx9x	Other plates
