

**SD308S-DS**

## IP66 Outdoor Integrated Smart All-in-one Display

Full-fit screen technology, Ultra-narrow frame 38mm, Ultra-thin thickness 98mm ,Ultra-large screen accounted for 96%

High temperature resistance with industrial-grade highlight screen

Level of protection: IP66, Anti-hazard classification: IK10

Military superconducting temperature equalization technology fast heat dissipation

# Product Features

## Ultra-narrow bezel, Full of beauty appearance

Our outdoor integrated smart display has a 38mm ultra-narrow frame, 98mm ultra-thin thickness, and 96% large screen-to-body ratio, making it narrower, thinner and lighter than conventional outdoor units.

## Military superconducting technology, fast heat dissipation

The military superconducting heat dissipation technology adopted can export heat at the fastest speed, minimizing the number of cooling fans or no fan for heat dissipation.

## High Brightness Display

The outdoor integrated smart screen provides excellent outdoor display with 3,500nits brightness and 24\*7 all-weather performance. The conventional outdoor unit can only achieve 2000nits.

## Optical binding, fully bonded design

It adopts LCD optical bonding integrated design, no heat dissipation channel in front of the screen, free of dust removal maintenance, and can be easily customized to adapt to various external environments.

## Industrial grade screen, high temperature resistance

The military superconducting heat dissipation technology adopted by the outdoor integrated smart screen can dissipate heat at the fastest speed, minimizing the number of cooling fans or no fan cooling. Even under direct sunlight, the outdoor integrated smart screen can resist blackening defects as high as 110°C and still display the image clearly, while the conventional screen can withstand a temperature of only 70°C.

## Circular polarized light visible under sunglasses

The circularly polarized LCD allows the outdoor integrated smart screen to display a viewing angle that can be viewed from almost any angle. It can be placed horizontally or vertically, and is also friendly to sunglasses.

# Product Features

## IP66 protection, stable and reliable

The outdoor integrated smart screen has a protection level of IP66, which can prevent water, dust, sun, cold, corrosion, and theft, etc., so it can be used stably and reliably in almost all kinds of outdoor weather

## Tempered glass, explosion-proof and anti-smash

The outdoor integrated smart screen is equipped with IK10 grade 9MM double-layer AR laminated glass to provide the best protection against complex outdoor environmental factors, and minimize damage caused by external impact. The outdoor integrated smart screen has a protection level of IP66, which can prevent water, dust, sun, cold, corrosion, and theft, etc., so it can be used stably and reliably in almost all kinds of outdoor weather

## Smart adjust Brightness

## Intelligent light sensor, low power consumption

The automatic brightness sensor automatically adjusts the brightness of the LCD screen according to the brightness of the outside light, thereby minimizing power consumption, energy saving and environmental protection.

## Rich diversified usage scenarios

The use of the outdoor integrated smart screen can be diversified for different application scenarios.

## Wall-mounted or Ceiling Installation

## Freestanding Installation
